IES TaP for BREEAM

IES TaP for BREEAM is a secure, cost effective and easy to use online project management system. IES TaP for BREEAM manages the whole project team through the assessment process directly through to BRE for QA and BREEAM certification.

- Cloud-based management system
- Real-time progress tracking in a centralised online location
- Fully integrated and approved by BRE for QA submission and certification
- Support for BREEAM UK, BREEAM International, BREEAM In-Use International, BREEAM-SE
- Create multiple project scenarios to achieve the required BREEAM Rating
- Assess New builds, extensions & major refurbishments, Building fit-out only, and Shell & Core assessments with half credits
- Collaborate with the whole design team ensuring everyone is clear on their individual responsibilities and progress
- Automatic email notifications including progress updates and deadline reminders against evidence
- Upload, store and reference all evidence documentation in a secure online location
- Extensive reporting including progress reports and visual charts
- SSL Encryption
- Centrally dedicated BREEAM reference source including reference guides and compliance requirements
- Full customisation possible - roles, responsibilities, project phases, due dates

Why choose IES TaP for BREEAM

Templating Services

Create a custom version of a particular BREEAM rating tool based on your own experience. Copy your customised evidence requirements and pre filled validation statements to any new projects.

Project Team Members

Assign team member responsibility and deadlines. No added costs for additional team members.

Overview of Projects

Greater oversight of your portfolio of projects, utilising automatic emails to ensure time is focused on value added activities.

Manage the Whole Project

Manage the entirety of the project from pre-assessment to submission and accreditation.

CASE STUDY

Winvic Construction

Through use of IES TaP, Winvic Construction are able to Winvic took BREEAM assessments in-house in 2023, having previously outsourced them to a consultancy. IES TaP is now a critical tool for Winvic enabling them to accurately manage many design and build projects simultaneously and help streamline, manage and automate the BREEAM certification process.

Key benefits:

- Customised Winvic template saves significant time and resource, by avoiding inputting the same data multiple times.
- Reporting and notifications:
 - Winvic utilise IES TaP's RAG traffic light reporting, an accurate, real-time method of keeping track of pending deadlines.
 - Also use IES TaP's automatic email notifications, ensuring team members are aware of pending task deadlines.

CASE STUDY

Waterman Group

Waterman Group uses IES TaP to offer real-time insights into project status of BREEAM assessments, both for new builds and refurb and fit-out assessments. IES TaP acts as a central reference point for uploading evidence to achieve BREEAM certifications as quickly and efficiently as possible.

Key benefits:

- Ability to manage ~60 projects simultaneously, at all different stages of completion
- Evidence is assigned to individual project team members, clearly indicating who is responsible for what, how much evidence they need to provide, and by when

Customer Testimonials

"IES TaP has made our business more profitable by making the BREEAM assessment process flow more efficiently and quickly than ever. The system's transparency means everyone knows who's due to do what, giving people a real incentive to respect deadlines. Assessments are at less risk of overrun and problems can be identified and addressed early on to achieve the highest ratings."

Barry Rankin
Director - Carbon.Climate.Certified

"I have used other project management software in the past, but IES TaP is a fantastic tool, enabling us to keep projects on track in the most efficient way. All of our BREEAM assessors use IES TaP, so everyone is working on the same platform. All of the data you need can be pulled from the software itself, saving so much time. You can apply different filters and extract specific information, depending on what you need to report on, and to whom."

Ludwika Balinska,
BREEAM and ESG Manager, Tide Construction
